

ROUTINE COMPUTER MAINTENANCE

Close ALL programmes,

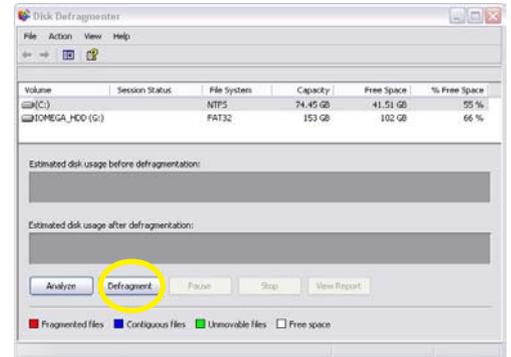

Some options can take a long time, so may be best done at 'end of day' and allowed to run overnight.

DISK DEFRAGMENTER

Start, All Programs, Accessories, System Tools, Disk Defragmenter.

When screen appears, highlight 'C' drive by clicking on it and click on 'DEFRAGMENT' button.

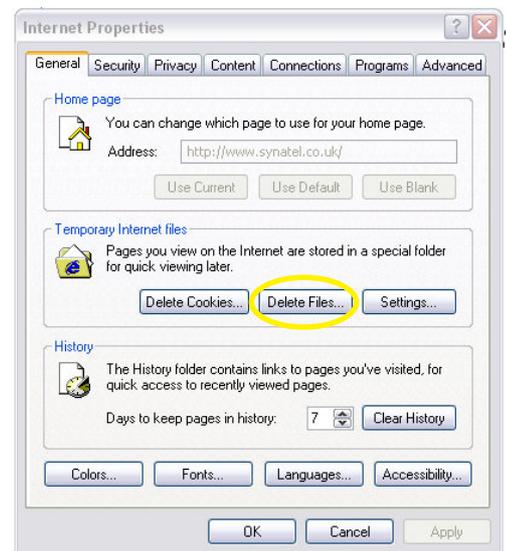

Exit when programme indicates it has completed.

INTERNET EXPLORER CACHE FILES

When a website is viewed, internet explorer copies the images to your hard-drive, which allows for quicker page opening if you go back to the same site at a later date. However, over time, the amount of images/files saved can be quite large and so it is useful to delete these files periodically.

Start, Control Panel, Internet Options, Delete Files - OK.

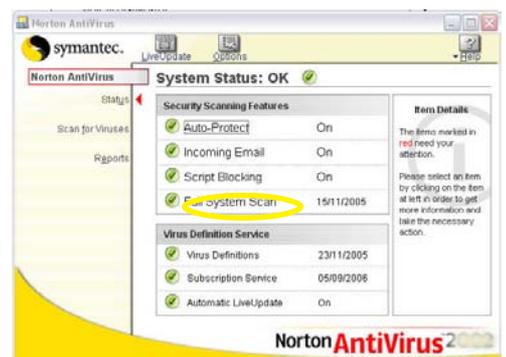

ANTIVIRUS SCAN OF HARD-DRIVE

(this section based on Norton A/V, other antivirus programmes will be similar).

Double click on 'Norton AntiVirus' icon in lower right-hand section of task bar.

First, to ensure latest antivirus profile is loaded, click on 'Live Update' & follow on screen prompts.

Then click on 'Full System Scan', click on 'Scan Now'.

EMPTY RECYCLE BIN

Double click 'Recycle Bin', File, Empty Recycle Bin
